YOUNG LIBRARY
OF THE
NATIONAL ACADEMY OF SCIENCES

PREFACE

This volume, the third two-year cumulation of the *I n d u s t r i a l A r t s I n d e x*, covers approximately the years 1922 and 1923. On a following page will be found the list of periodicals indexed. Of these, the following were added to the list in 1923:

American Dyestuff Reporter (New York), Textile Colorist (Philadelphia), Journal of the Society of Dyers and Colourists (London), Chemical Age (London), National Safety News (Chicago), Professional Engineer (Chicago), Journal of the Textile Institute (London).

The list of Technical Societies has been compiled from the magazines indexed thru the two-year period and has been brought as nearly up to date as possible.

The book titles which have been listed monthly in the *I n d e x* in the past two years, have been incorporated under their proper subject headings in the main alphabet with the periodical references. These books and pamphlets, numbering 3781, include British, and some French and German, as well as American books, and cover a wide range of subjects relating to business, technology and economic problems. Bibliographies from the Library Journal and other periodicals not regularly indexed are also included.

Grateful acknowledgment is made to Miss Elsie Schonholtz who has revised a good part of the copy and to Miss Bella Traum and Miss Dorothy Whittaker for preparation of copy and other work.
